PROJECTS & COMPETITIONS

Financial Analysis & Business Strategy | 1st PLACE: Merck Data Analytics Case Competition

Jan. 2024

- Analyzed historical financial performance across three product lines and projected operating income and margins to assess profitability, production efficiency, and product portfolio strategy.
- Evaluated proposed pricing and launch economics using \$20 million in fixed costs and a \$200 per-unit contribution, calculating a break-even threshold to assess financial viability and required sales volume.
- Assessed competitive positioning, customer needs, and product differentiation to develop a business recommendation; translated quantitative findings into an executive presentation, earning first place as part of a five-person team.
